

Taha Nadeem

Roll Number: FA24-BCS-109

CSC336 - Web Technologies - Fall 2026 | Assignment 1

Assignment Statement

Assignment 1 - Your Personal CV Page. Difficulty: Foundational. Covers: Lectures 3-6 (HTML & HTML5, Semantic HTML and Forms, CSS Fundamentals, the CSS Box Model). Folder: assignment-1/

Task: Build a single-page personal CV/resume as a static HTML + CSS website - no JavaScript, no framework, just semantic HTML5 and hand-written CSS. This is where you prove you actually know the raw building blocks before anything is allowed to hide them from you.

Your page must include, at minimum:

- A header with your name, a short professional tagline, and a photo (a placeholder image is fine).
- An "About Me" section.
- An "Education" section listing your academic history in a semantic list or table.
- A "Skills" section.
- A "Contact" section with a real `<a href="mailto:...">` link and at least one social/portfolio link.
- Correct use of semantic HTML5 elements throughout - `<header>`, `<nav>`, `<main>`, `<section>`, `<article>`, `<footer>` as appropriate, not a page built entirely out of unstyled `<div>`s.
- Styling entirely in a separate `styles.css` file (external stylesheet, not `inline style=""` attributes) using the box model correctly - sensible margins, padding, and borders, not everything jammed against everything else.

Deliverables in assignment-1/: `index.html`, `styles.css`, any images, and your completion PDF.

Screenshots of the Finished Page

Figure 1: Header, navigation, About Me and Education

Figure 2: Skills and Projects

Skills • AI / Machine Learning: multi-agent systems, expert systems, rule-based AI, forward chaining, decision trees (conceptual) • AI / LLM Tools: Google Gemini API, prompt engineering, agent orchestration • Programming Languages: Python (primary), C++, Java, C, JavaScript, SQL, HTML5, CSS • Data Science: Pandas, NumPy, Matplotlib, Jupyter Notebook, yfinance, BeautifulSoup • Web & APIs: FastAPI, Flask, React.js, REST API design, Vite, Node.js (basics) • Databases: MySQL, Microsoft SQL Server • Tools: Git, GitHub, VS Code, IntelliJ IDEA, JDBC, Figma (basics)
Projects CareerOS AI: Multi-Agent Career Intelligence Platform Python, FastAPI, Google Gemini Team of 4 Sep 2026 • Built a 5-agent AI system (Resume, GitHub, Job Matching, Skill Gap and Master synthesis agents) that evaluates career readiness from real evidence rather than self-reported claims. • Developed a FastAPI backend using the Gemini API for agent orchestration, with a PDF-parsing and GitHub REST API evidence pipeline. • Submitted to the Alibaba Cloud AI Hackathon Pakistan 2026. Student Performance Advisor: AI Expert System Python, Flask, React, Rule-Based AI Individual 2026 • Designed a rule-based expert system using forward-chaining inference to assess student academic risk from attendance, grades and behaviour. • Built a Flask REST API (3 endpoints) connected to a React (Vite) frontend that outputs a risk score, a reasoning trace and recommendations. Extracting and Visualizing Stock Data Python, Pandas, Matplotlib, Web Scraping IBM/Coursera Project 2026 • Built a data pipeline that extracts Tesla and GameStop stock data (yfinance) and revenue data (BeautifulSoup), then cleans and charts both.

Figure 3: Certifications & Activities, Contact and footer

Certifications & Activities Certifications • IBM Data Science Professional Certificate (5 courses completed), Coursera • Introduction to Artificial Intelligence, IBM via Coursera • Git & GitHub Essentials, Apna College Achievements & Activities • Alibaba Cloud AI Hackathon Pakistan 2026: built and submitted CareerOS AI in a team of 4 • Adobe University Hackathon: participant for COMSATS Lahore • GDG Cloud Lahore, AI Seekho Builder's Day 2026: attendee • FCCU Azaadi Sports Fest 2025: volleyball runner-up for COMSATS Lahore Contact • Email: tahanadeemwork@gmail.com • Phone: +92 300 3780121 • GitHub: github.com/tahanadeemwork • LinkedIn: linkedin.com/in/taha-nadeem-

      <section id="about">
        <h2>About Me</h2>
        <p>
          I am a Computer Science student at COMSATS University Islamabad
          (Lahore Campus), building a path toward becoming an AI Engineer. My
          work combines machine learning and data science coursework with
          hands-on projects: a rule-based AI expert system, REST APIs, and a
          multi-agent LLM application built for the Alibaba Cloud AI Hackathon
          Pakistan 2026.
        </p>
        <p>
          I take part in Lahore's AI and tech community through GDG Cloud
          Lahore, and I am looking for internship or entry-level opportunities
          in AI engineering, applied machine learning and intelligent systems.
        </p>
